LAUDA CIRCULATION CHILLERS

Specific application examples

-
- Rotary evaporators
 - Distillation systems
 - Spectrometers
 - Supply of cooling traps
 - Digital printing
 - Laser cutting
 - Laser sorting
 - Point welding
 - Injection molding
 - Tunnel drilling machines
 - Centralized cooling water supply

LAUDA Microcool

Circulation chillers for reliable continuous operation in laboratory and research applications from -10 to 40°C

-10 °C 40 °C

Compact circulation chillers with outstanding price-performance ratio

The LAUDA Microcool line of user-friendly circulation chillers consists of four compact models with large LED display and membrane keypad, offering cooling capacities of 0.25 to 1.2 kW. The highlight of these devices is the premium quality centrifugal pump with magnetic coupling – unique to this price category: Magnetic coupling of pump and electric motor prevents any kind of seal issue from arising on the pump shaft, eliminating the chance for any fluid to leak.

Illuminated viewing glass enables quick identification of the fill level

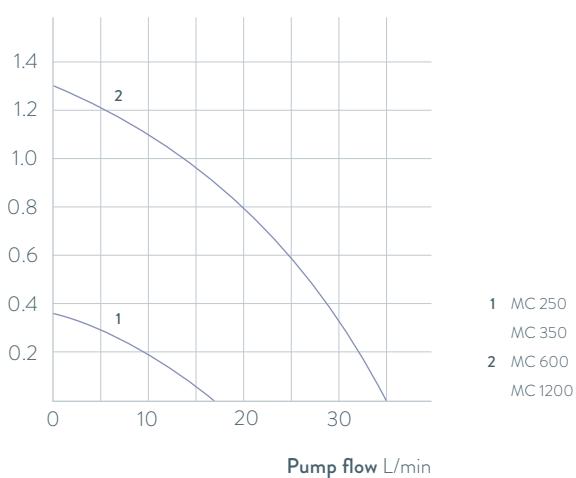

Standard-issue RS-232 interface and alarm contact

PUMP CHARACTERISTICS

Heat transfer liquid: Water

Pressure bar

- 1 MC 250
MC 350
- 2 MC 600
MC 1200

Important functions

- Auto-start timer and auto shutdown function
- Filling opening at the top, drain connection at the rear
- Cooling capacity adapted via solenoid valve control, including automatic compressor control

Included accessories

Nipples, screw caps

Further accessories

Tubing

All technical data and power supply variants can be found in the [Technical data](#) section.

More at www.lauda.de/de/1764

LAUDA Microcool

The compact circulation chillers MC 250 and MC 350 fit effortlessly on a lab bench. Somewhat larger models are also available having 600 and 1200 watts of cooling capacity and which can be positioned on the floor under a lab bench to save space.

LAUDA Ultracool

Energy-efficient process circulation chillers from -10 to 35 °C

-10 °C 35 °C

LAUDA Ultracool circulation chillers with an energy saving of up to 50 percent

Developed with a focus on energy efficiency, the LAUDA Ultracool circulation chillers make a pivotal contribution to reducing your operating costs. Depending on the operating conditions, the devices make it possible to reduce energy costs by up to 50 percent, with payback times of less than one year. The innovative operating concept enables the LAUDA Ultracool circulation chillers to be conveniently monitored and controlled from a distance – via a connected remote control or the integrated web server on a PC or laptop or connected to the LAUDA.LIVE Cloud via a 4G wireless gateway. This allows comfortable operation via PC or laptop.

Suitable for outdoor installation (IP54)

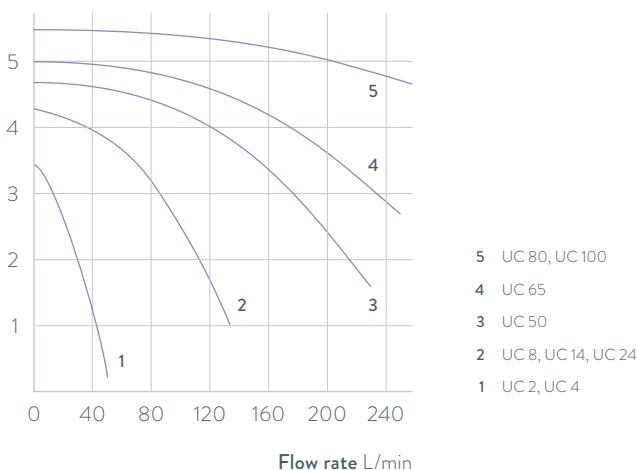

LAUDA Ultracool UC 2/UC 4 in a compact size

PUMP CHARACTERISTIC

Standard pumps (3 bar), 50 Hz; Heat transfer liquid: Water

Pressure bar

Important functions

- High energy efficiency results in low operating costs
- Operation via LCD remote control unit or web server
- Increased temperature stability of ± 0.5 K
- Remote monitoring and maintenance via LAUDA.LIVE

Included accessories

Ethernet interface, remote control unit, stainless steel connections

Further accessories

Hose kits, reverse flow protection, 4G wireless gateway

All technical data and power supply variants can be found in the [Technical data](#) section.

More at www.lauda.de/de/1778

LAUDA Ultracool

The energy-efficient LAUDA Ultracool circulation chillers comply with the Ecodesign Directive 2009/125/EC. This defines performance requirements with regard to energy efficiency (SEPR indices) that process circulation chillers in this performance class must fulfill. LAUDA Ultracool chillers meet and some even exceed these requirements. Depending on the operating conditions, the new circulation chillers are up to 50 percent more energy-efficient than conventional models.

*All data for the plug codes can be found on page 174

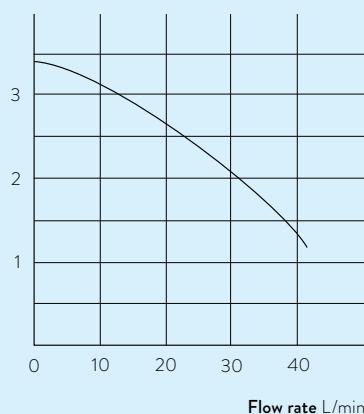

LAUDA Circulation chillers

More characteristics

LAUDA Ultracool / Page 52

PUMP CHARACTERISTIC Heat transfer liquid: Water

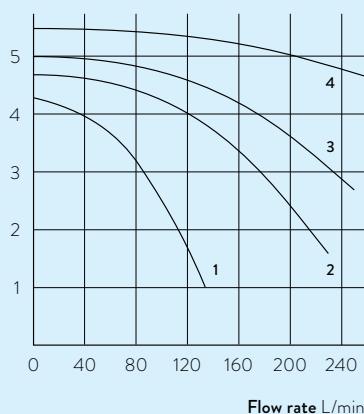

Pressure bar

UC 2, UC 4

PUMP CHARACTERISTIC Heat transfer liquid: Water

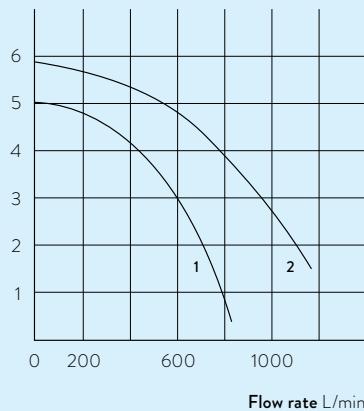

Pressure bar

- 4 UC 80, UC 100
- 3 UC 65
- 2 UC 50
- 1 UC 8, UC 14, UC 24

PUMP CHARACTERISTIC Heat transfer liquid: Water

Pressure bar

- 1 UC-1350
UC-1700
- 2 UC-2400
