

Toxic Substances Control Act (TSCA) Self-Declaration

On January 6, 2021, the U.S. Environmental Protection Agency (EPA) published final rules under Toxic Substances Control Act (TSCA) Section 6(h) to restrict the importation and use of the following five persistent, bioaccumulative, and toxic (PBT) chemicals:

Phenol, isopropylated phosphate (3:1) (PIP (3:1))	CAS: 68937-41-7
Decabromodiphenyl ether (DecaBDE)	CAS: 1163-19-5
2,4,6-Tris(tert-butyl)phenol (2,4,6-TTBP)	CAS: 732-26-3
Hexachlorobutadiene (HCBD)	CAS: 87-68-3
Pentachlorothiophenol (PCTP)	CAS: 133-49-3

For your information, DecaBDE and HCBD are already regulated by various global legislation and are not present in our products. Nevertheless, LAUDA completed a risk-based sampling of the supply chain regarding the presence of those five chemicals in our parts or components. Based on the information we have received from our suppliers at the date of this declaration, none of the five chemicals as listed above are being intentionally added to our products.

This statement is based on the information available to us from our suppliers and applies to our non-chemical products. We provide a safety data sheet with all chemical products, which contains a list of the substances in section 3. The safety data sheets are also available on our website.

LAUDA DR. R. WOBSEER GMBH & CO. KG
Laudaplatz 1,
97922 Lauda-Koenigshofen
Germany
