Coolant valve with LiBus control for M16x1 connection thread Part Number: A001657

Features

- The cooling liquid valve is designed for operation with cooling water only.
- With the cooling liquid valve, the cooling water quantity can be controlled (on/off) by means of LiBus module, by opening the cooling water inlet only when cooling is required.
- Operation up to T = 155 °C possible.
- A001657 includes four hose clamps, two hose nozzles (1/2") and a one meter long hose in addition to the coolant valve. Due to the weight of the coolant valve, please do not screw the coolant valve directly onto the cooling coil.
- For safe operation of the cooling liquid valve with water above 100 °C, the free hose end of the cooling coil must be fixed at the outlet, as a steam blow may occur in the short
