Reverse flow protection / shut down valve
with LiBus control

Part Number: A001753

Features

- The shut-off valve/reverse flow protection enables safe operation of the thermostat with an external closed consumer (e.g. a jacketed vessel).
- The shut-off valve/reverse flow protection is designed for an operating temperature range of the heat transfer liquid from -40 °C to 130 °C.
- A001753 includes a check valve, solenoid valve, and an insulated metal hose set for connecting to the pump connections.
- When connecting, please note the position of the thermostat and the consumer in relation to each other!
