Automatic refill
with LiBus connection
Part Number: LCZ 9661

Features

- The automatic filling device compensates the loss of evaporated bath liquid, by especially by using baths with a large open bath surface and at higher temperatures.
- When using water as bath liquid, the unit can be connected to a water supply via the automatic filling device. In addition, units with a delivery/suction pump can draw the bath liquid from a storage container (e.g. canister) via the automatic filling device.
- The automatic filling device can be connected to units which are equipped with a LiBus modul and which have a multi-step level measurement.
- The valve is designed for operation down to -10 °C.

Technical Features

Connection 1 thread (inside)

M16 x 1

Connection 2 thread (inside)

M16 x 1

Weight

0.68 kg
